

AI Job Loss in India: Are You Safe by 2027?

Jobs at Risk, Reality
Check & Future Careers.

A Guide for Students & Job Seekers

AI Job Loss ki charcha kyun ho rahi hai?

Layoffs

Global **layoffs** aur **recession** ka dar market mein faila hua hai.

IT Giants

TCS, Infosys, aur Wipro hiring patterns change kar rahe hain—**workforce reduce** ho rahi hai.

Automation

Chatbots aur **automation** ab human support ka kaam 24/7 kar rahe hain.

Abhi ka Data: Reality Check (2024–25)

Impact on IT Services Jobs

6.5 Lakh+

IT Services jobs affected

- Bengaluru aur Hyderabad jaise tech hubs mein sabse zyada impact dikh raha hai.
- Entry-level jobs par AI aur automation ka heavy pressure hai.

5 Jobs at High Risk (By 2027)

Job Role	Risk Level	Reason
Data Entry Operator	High	AI tools easily automate repetitive work.
Customer Support	High	Chatbots & Voice AI active 24/7.
Retail Cashier	High	Self-checkout & Digital payments rise.
Entry-Level IT Support	Med-High	Basic coding/debugging handled by automation.
Admin Jobs	Medium	AI handles scheduling & reporting.

Sabse zyada asar kis par padega?

Freshers – Jo abhi career start kar rahe hain aur experience kam hai.

Repetitive Tasks – Rule-based work karne wale log (Data/Files).

Non-Tech Grads – Jinke paas digital skills ki kami hai.

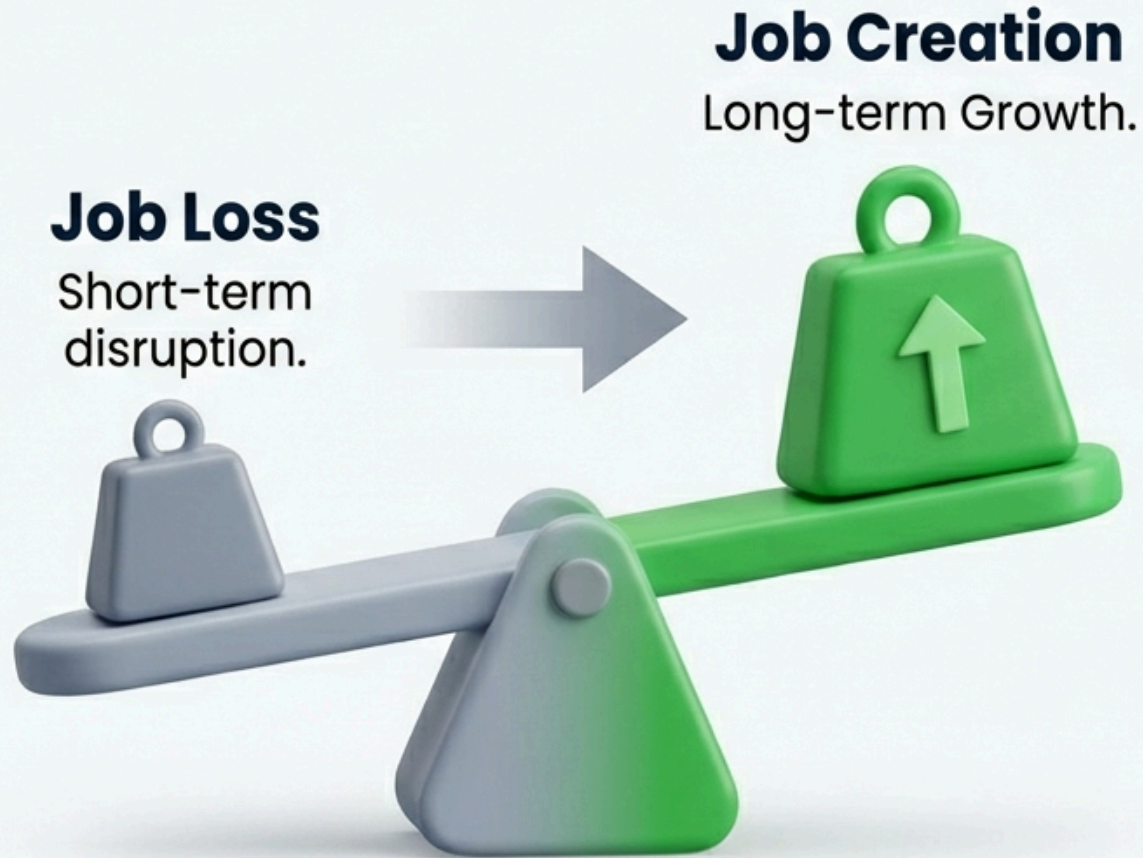

BPO Sector – Traditional call center employees.

Skill Stagnation sabse bada risk hai!

Good News – AI Jobs Create bhi kar raha hai!

World Economic Forum ke mutabik, AI long-term mein **Net Positive** jobs create karega.

Nayi industries ban rahi hain jo pehle exist nahi karti thi.

Healthcare, Data Science, aur **AI ethics** mein demand badh rahi hai.
